

Healthy Living October 25th with Dr Ross Walker & David Prior

Oct 25, 2015, 9:28 PM

This Week: The Federal Government has announced it will legalise the growing of cannabis for medicinal purposes. An expensive cancer drug may reverse late-stage Parkinson's disease, enabling participants in a small clinical trial to speak and walk again for the first time in years. Living in a neighbourhood where there is greater access to fast food outlets may be linked to poorer bone development in early childhood. Moles are usually harmless, but they can be used to assess a person's risk for developing skin cancer. Heart disease is all about cholesterol, or is that a Medical Myth?
